User Manual

Preparation

- Rotate the tank cover at clockwise direction to the end and pull upward to take out the cover.
- Pull out the plug of the tank and add mineral water, pure water or astringent toner into the tank.

- Close the plug of the tank and rotate it at anticlockwise direction to the end.
- Before using smart working mode, please download CosBeauty official APP: CosBeauty

APP
Download

Supported system :
iOS/Android

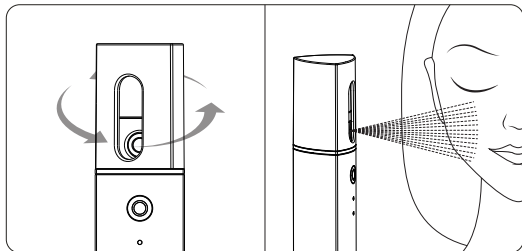

How to use:

There are two spraying modes : traditional mode and smart mode

Traditional mode

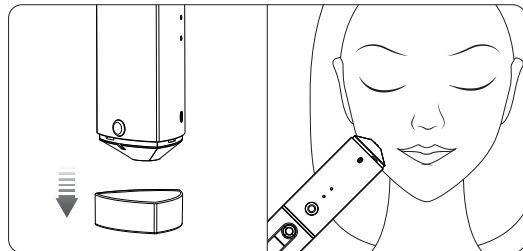

- 1 Rotate the tank anti-clockwise to the end and the indicator light will be on which means the device is powered on.
- 2 Place the device to skin at 10cm distance and press the power button for one time, the mode is with make-up spraying, press the power button twice, the device will be changed to without make-up spraying mode. Press the power button for three times, the spraying mode will be off.

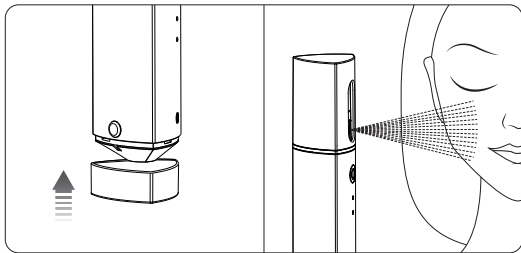

- 3 Rotate the tank clockwise to the end and the indicator light will be off which means the device is shut down.

Smart mode

- 1 Take off the bottom cover, rotate the tank clockwise to the end and turn on bluetooth on your phone, click[CosBeauty aiMoist Smart Hydrogen water Mist Spray], the APP will be connected to the device.
- 2 Choose testing skin area on the APP interface and use equal pressure to touch your skin with the two metal sensors. The moisture needed for your skin will be calculated automatically by the APP.

- 3 Put the bottom cover on and press the power button, the tank indicator will be on and the aiMoist Smart Hydrogen water Mist Spray will set the spray volume of the calculated data by APP.

- 4 Place the device to skin at 10cm distance and start spraying, the device will turn off automatically when your face get the preset volume water.
- 5 Rotate the tank clockwise to the end and the indicator light will be off which means the device is turn off.

Skincare Products can be used together

- Mineral water, purified water or non-thick toner can be added into the tank, and please do not put oily or sticky cosmetic liquid into the tank.
- It is suggested by CosBeauty that any oily materials like essential oil should not be added into the tank because it might lead to no function or block the atomizing nozzle.

Charging

Battery specs

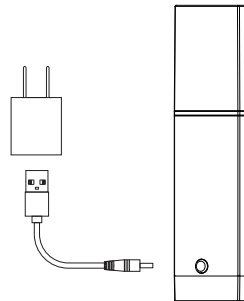

800mA Li-ion, recharging time
150mins, working time 150mins, stand by
15 days.

Battery power indicator

Low battery: Indicator light blinking
High battery: Indicator light on

Charging methods

- Connect power cord and adapter (5V/1A) with device to charge. During charging, indicator light will blink and when fully charged, the indicator light will be on.
- Please charge the device only under dry and safe environment.
- Please use the original power adapter ONLY.
- Do not use the original adapter on any other products.
- Please do not expose the power cord or adapter into any liquid.
- Please do not touch or plug out the power cord with wet hands.
- Please do not twist power cord onto the device when charging.
- Please cut down the power immediately if the power cord is broken in case it may cause fire.
- Please do not use broken adapter and power cord.

Maintenance

- It is suggested to clean the tank once in a week.
- Please do not add oily or sticky cosmetic liquid or essence oil into the tank.
(Please do not add any cosmetic liquid which contains thickener like carbomer, xanthan gum or coconut oil into the tank. If you are not sure, please consult CosBeauty Service Site or customer service line.)
- When the device is not used for a long time, please keep the tank dry and put the device in cool dry place.
- The device is not totally waterproof, please do not use the device with wet hands or wash it with water.
- Please make sure that the two metal sensors are dry and clean before testing to ensure testing accuracy.

FAQs

Why bluetooth can not be connected?

- Please make sure the bluetooth of your phone is opened and CosBeauty APP is running.
- Please take away the bottom cover of the device and make sure the bluetooth indicator light is on.

There is no spraying function

- Please make sure the device has enough power and there is liquid in the tank.
- Please make sure the atomizing nozzle has been rotated to the right direction just above the power button.
- Please clean the tank completely if you have added sticky or oily liquid into the tank, the atomizing nozzle might have been blocked.

FCC Caution

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
